Hello Meg,

Syngenta concurs with the indicated language in the email below.

With Best Regards,
Monty

Subject: Concurrence Requested ASAP - Dicamba Bulletins Live Language

CAUTION: This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear George:

EPA requests concurrence asap with the following language regarding hooded sprayers for BLT language associated with the dicamba decision:

“To protect federally listed threatened and endangered species, both a 310-foot in-field wind-directional spray drift buffer and a 57-foot omnidirectional in-field buffer are required. **If applying with a qualified hooded sprayer**, both a 240-foot in-field wind-directional spray drift buffer and a 57-foot omnidirectional in-field buffer are required to protect federally listed threatened and endangered species. Please see **[URL]** for a list of qualified hooded sprayers.

The following areas may be included in the buffer distance composition when directly adjacent to the treated field edges:

- Roads, paved or gravel surfaces, mowed grassy areas adjacent to field, and areas of bare ground from recent plowing or grading that are contiguous with the treated field.
- Planted agricultural fields containing dicamba-resistant plantings of cotton and soybeans.

- Areas covered by the footprint of a building, silo, or other man made structure with walls and or roof.”

Thank you,

Margaret Hathaway (Meg)
